

WHO CAN BE VACCINATED AGAINST COVID 19 TODAY IF THEY WISH ?

Vaccines against COVID 19 are available in French Guiana to everyone over the age of 12.

If you have any questions:

Contact the health center staff: they are there to answer your questions!

Wear your masks, vaccinate yourself, protect yourself: let's all fight against COVID 19 !

COVID19

GOOD NEWS ! THE COVID 19 VACCINE IS AVAILABLE ! IT'S UP TO YOU !

HOW DOES IT WORK ?

Our body is like a house: to be well protected, we must have a solid door and lock it.

Vaccine against COVID 19 is the strong door that will allow us to reinforce the protection of our house. It will help our body recognize the virus and better defend itself against severe forms of the disease.

Vaccine + barrier measures = our body is well protected, the virus is not likely to enter!

HOW WAS THE VACCINE MADE?

Vaccines available in French Guiana and offered in the Health Centers were manufactured thanks to the many researchers from several countries who worked together. All steps required to manufacture the vaccine against COVID 19 were followed before using it.

The vaccine is safe and effective !

HOW CAN THE BODY REACT AFTER VACCINATION?

When you are vaccinated against COVID 19, you may feel pain at the site of the injection, fatigue and fever. These sensations could last a few days and can happen with all vaccines, such as yellow fever.

The vaccine is safe, it is not dangerous for the person vaccinated !

WILL THE VACCINE CHANGE MY BODY? WILL IT PREVENT ME FROM HAVING CHILDREN?

The COVID 19 vaccine cannot change my body. It cannot change the color of my eyes, my skin or my hair. It cannot change me. The COVID 19 vaccine does not stop people from having children! As it has been several months since the first people were vaccinated, we know that the vaccine has proven to be safe.
